#### PREFACE

California Prisoners and Parolees, 1989, is a presentation of statistical data about felons and non felons under the jurisdiction of the California Department of Corrections (CDC). Statistical data on felons in CDC have been published since 1950 when the first issue of California Prisoners, covering the years 1945 through 1949, was released. Statistical data on civilly committed narcotic addicts have been published since 1967 when the first issue of Summary Statistics, Civil Commitment Program for Narcotic Addicts, covering the years 1961 through 1966, was published. Beginning in 1981, the two were combined into one publication. The Civil Narcotic Addict Program is covered in the last chapter along with other CDC populations.

The first chapter is a summary of the total departmental population and movements into and out of the institutions and parole regions during Calendar Year 1989. The second chapter looks at felons newly received from court, while the third chapter looks at parole violators returned with a new commitment. The next chapter covers characteristics of the institution population on December 31, 1989. The fifth chapter looks at the behavior of inmates in the institutions, while the sixth chapter is a summary of characteristics of parolees. The seventh chapter covers parole movements, and finally, the last chapter looks at other populations in CDC: the Civil Narcotic Addict Program, the County Diagnostic Cases, the Community Based Programs (work furlough and local jails), Inmates on Death Row, and Parolees at Large (PALs).

The Director of Corrections administered nineteen institutions and four parole regions in 1989. The types of commitments received by CDC are Felons, Civil Narcotic Addicts, County Diagnostic Cases (under Penal Code Section 1203.03), some Youth Authority commitments, federal prisoners, and prisoners from other states.

#### TIME CREDITS LOST

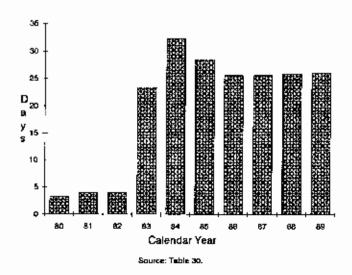

Information presented is based on the average credit losses for violations of the Director's Rules of the Department of Corrections, specifying acceptable conduct.

The maximum credit loss for each offense was increased by legislation, effective January 1, 1983, from 45 days to 180 days for inmates under the Inmate Work Training Incentive Program (IWTIP) (see Glossary for definition). Inmates who committed their offense prior to January 1, 1983 and were eligible to participate in the IWTIP were given the option of continuing under the Good Time Credit System with a maximum credit loss of 45 days. An amendment implemented on January 1, 1985 increased the maximum credit loss to 360 days for acts of violence and attempted violence as specified by Penal Code Section 2932(a)(1).

Credit losses for parole violators returned to custody (PV-RTC) eligible to lose credits with implementation of legislation on September 30, 1987 and inmates with indeterminate sentences eligible under the IWTIP are not included in this report.

- The average number of days lost per felon (based on the average daily institution population, ADP) for 1989 was 26.1. This average is based on both inmates who lost credits and inmates who did not lose credits.
- The average days lost for men has remained about the same for the last four years (1986-1989).
